It's Not Really About Us...

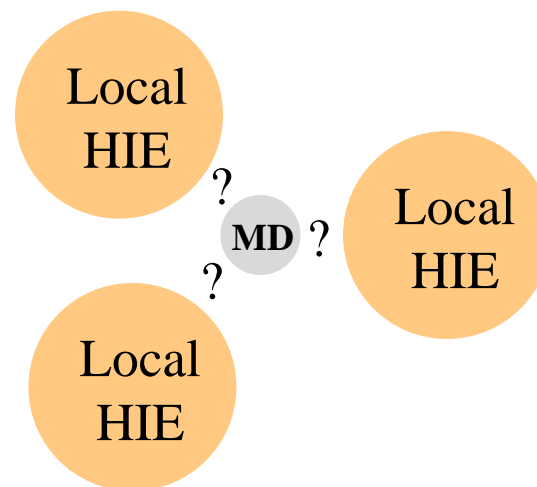

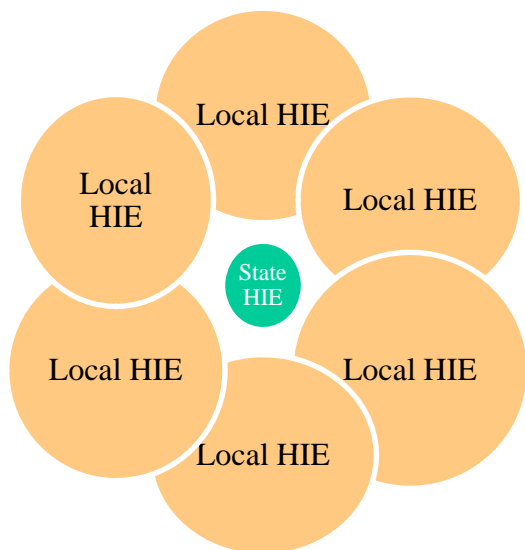

“The work we are about is improvement of patient and population health...The key players in bringing this change about are those who deliver, receive and pay for health services... HIE is a necessary-but-not-sufficient condition to bring about this desired future state. The Washington State HIE will not be all things to all people. The HIE will be optimized to link, to leverage, to support, and to accelerate the important work of those who...demonstrate a commitment to building a better-performing health services delivery system.”

Washington State HIE
Strategic and Operational Plans 7/6/10
Executive Summary Introduction

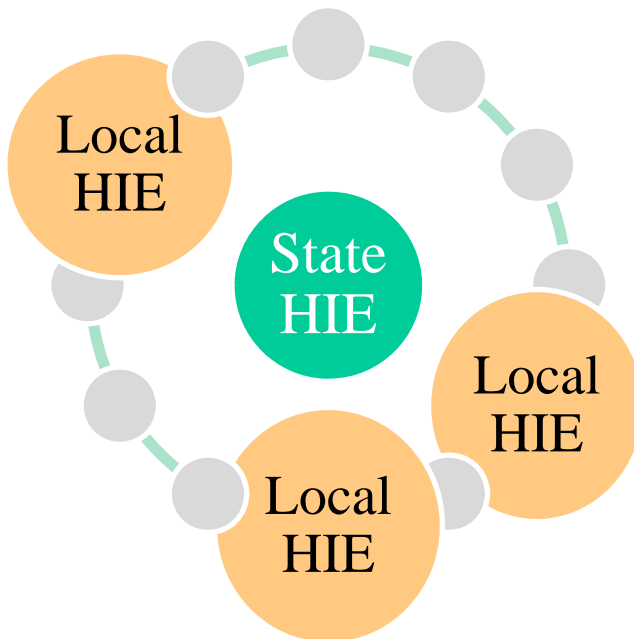

Blending State Law - ARRA - The Market

The HIT/HIE Landscape

Lots going on in WA to exchange information, and improve patient and public health

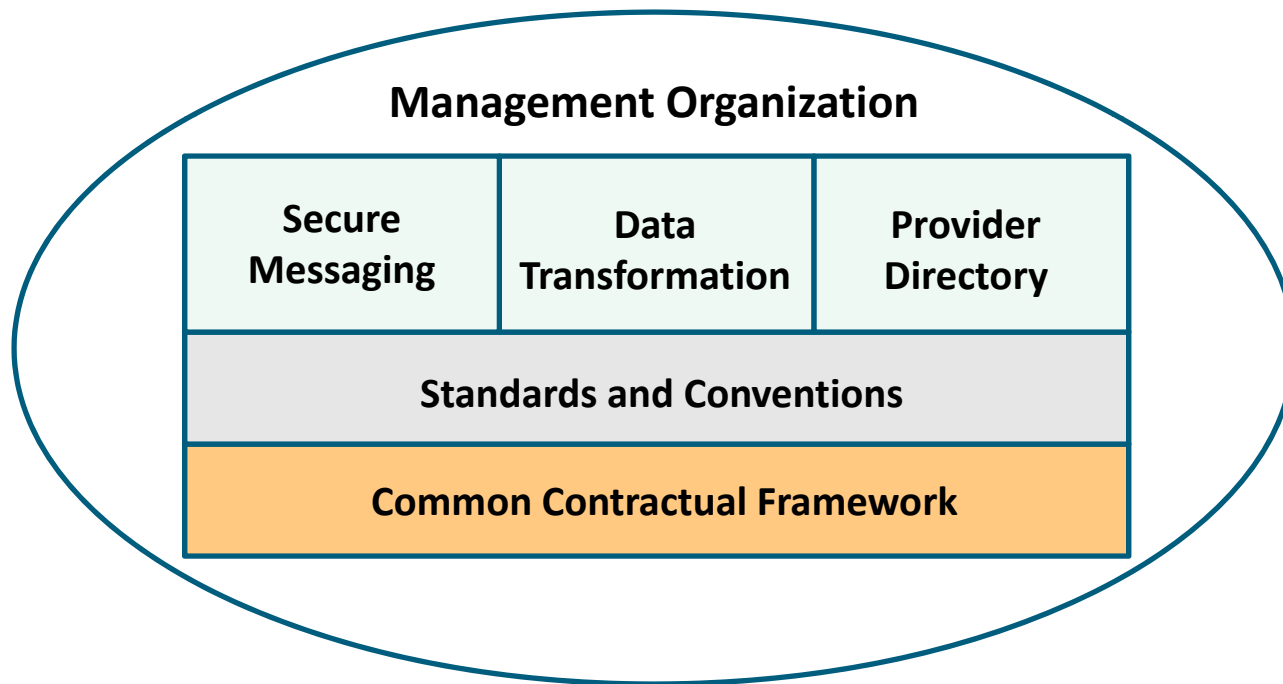

State HIE will be an HIE not the HIE, it needs to adapt to the requirements of the local market

“Thin-Layer” HIE – The Best Fit for the Washington State Market

Modest, Scalable, Flexible

Reduce Operational Complexity, Privacy Risk and Cost

No applications or repository – better done by others in the marketplace
Exploring options for patient matching

OneHealthPort | HIE

Washington's Statewide
Health Information Exchange

Why OneHealthPort Partnered With

Select Axway Customers

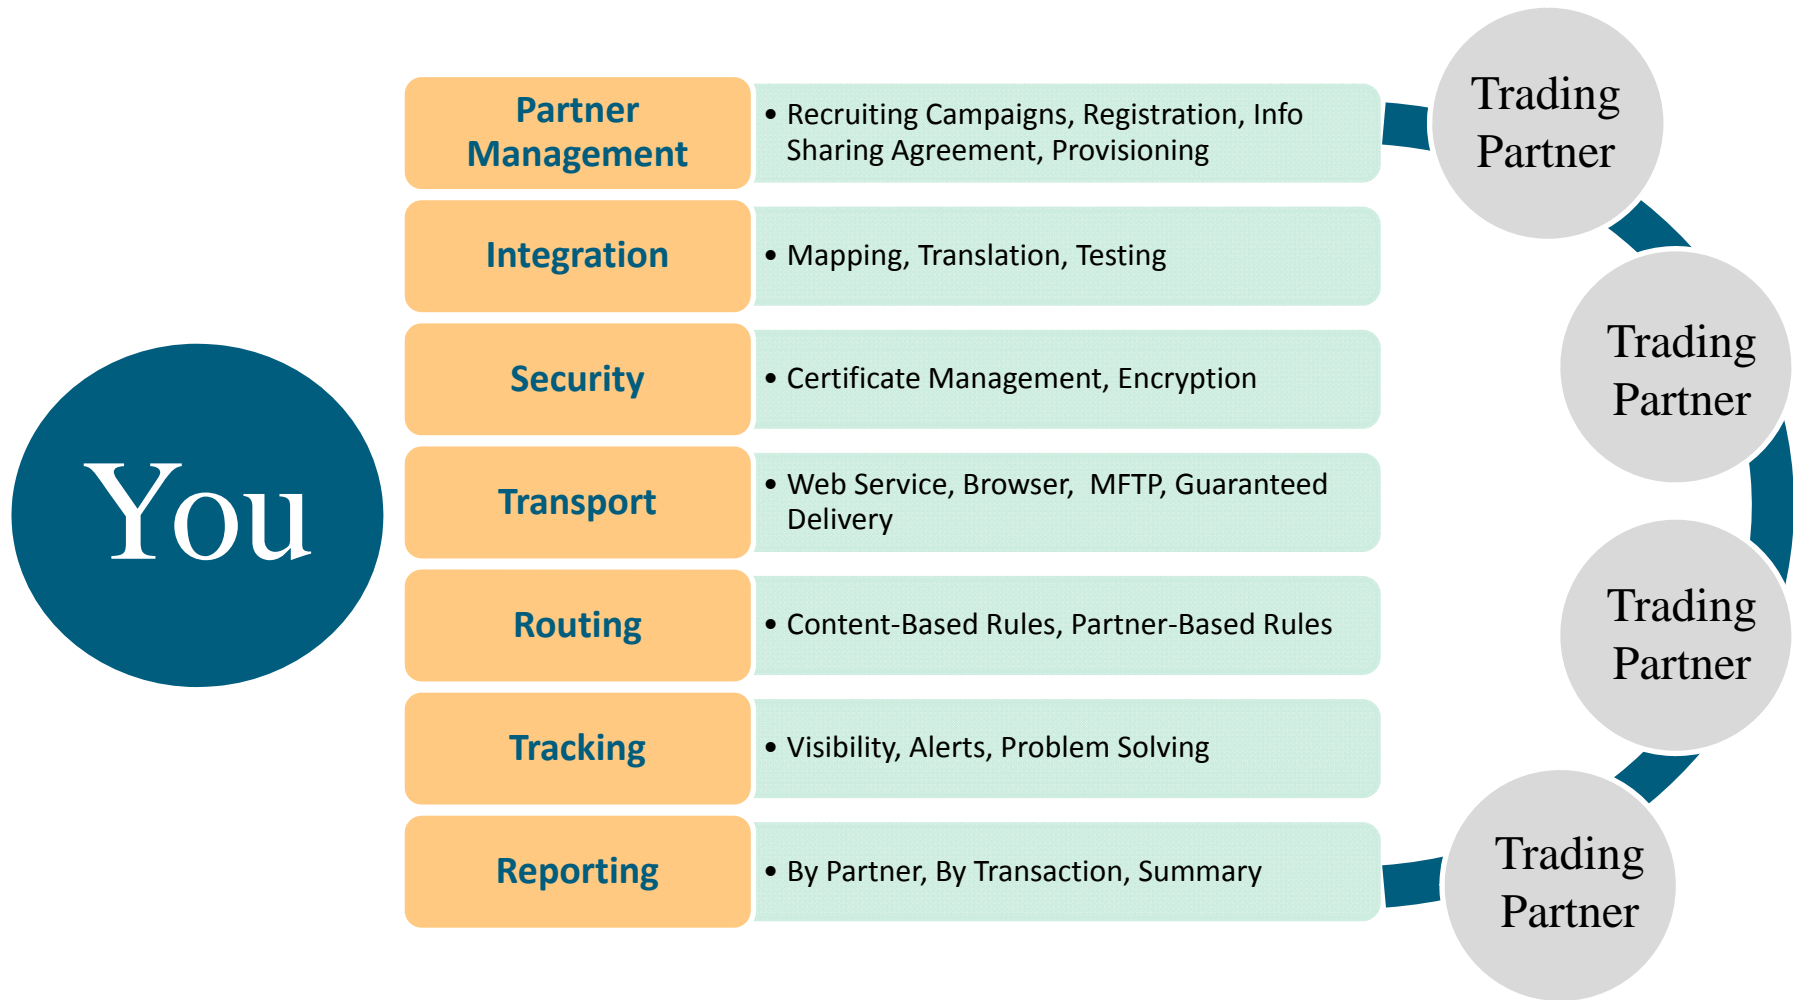

- Stable, scalable platform
- Canonical standard vs. deep interfacing
- Unbundled “thin” offering
- Unique campaign and self-registration tools
- Most competitive price

Why can't health care be more like everyone else?

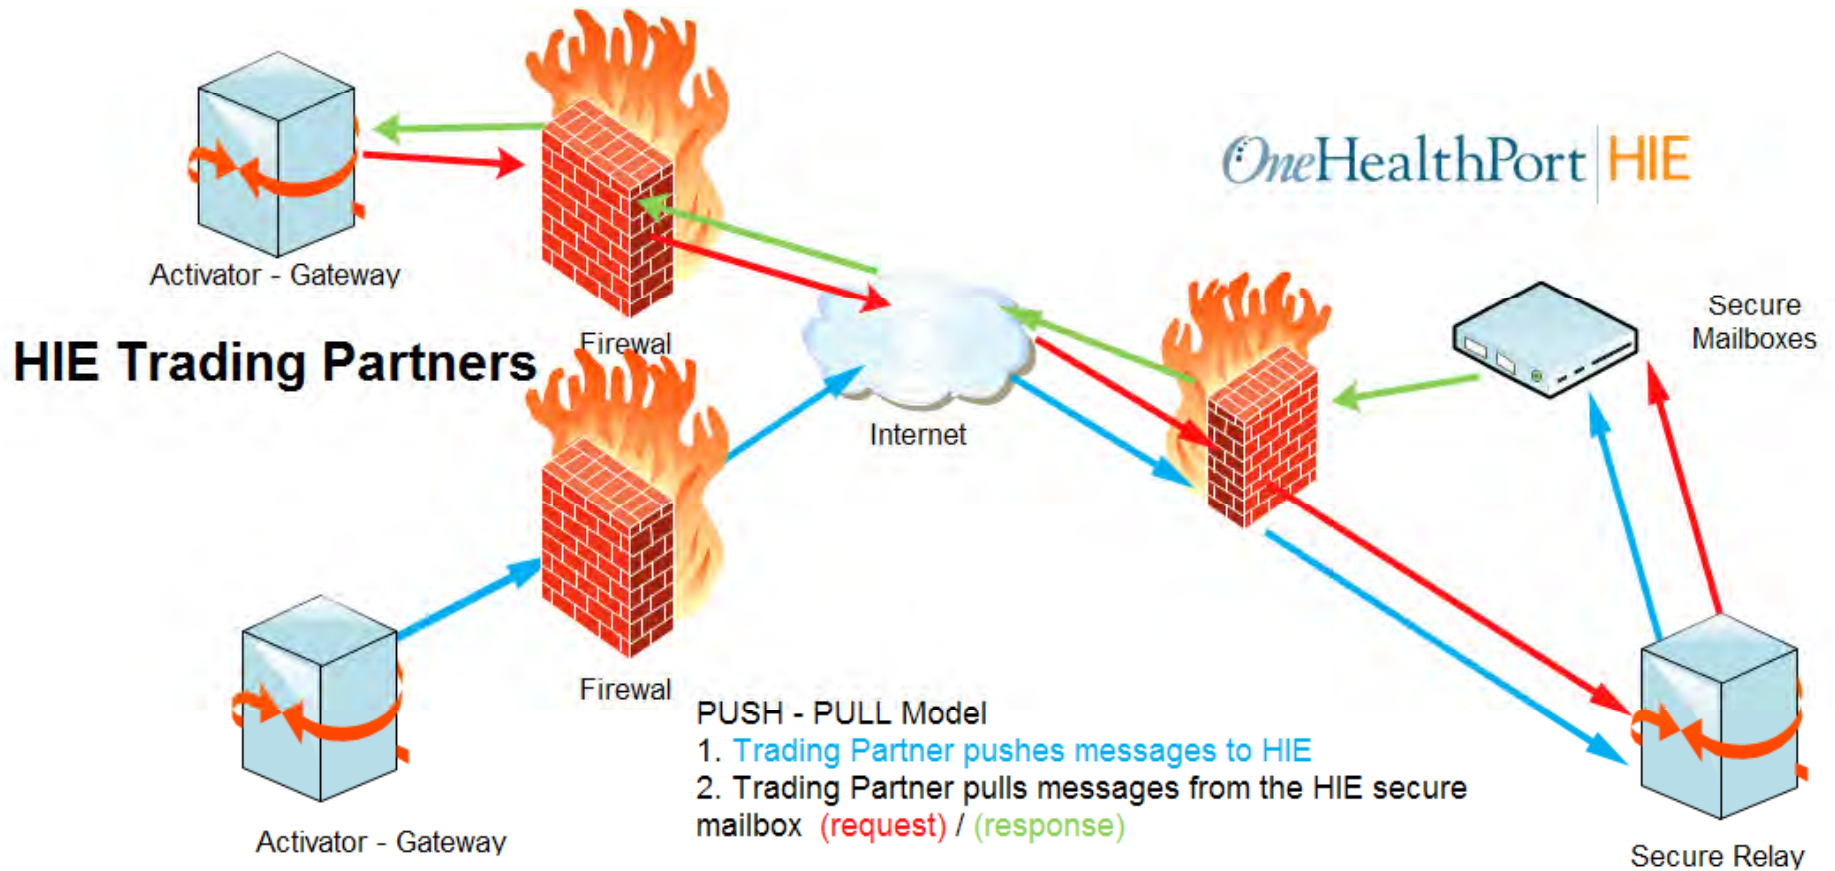

Your Many Information Trading Partners

One Consistent Approach to Connect All Information Trading Partners

Making the Connection

Initial Pricing – Reduce Early Adopter Risk

- Initial pricing model has three components:
 - One-time license fully subsidized by ARRA \$ for early adopters
 - Mapping costs will vary, some subsidy available
 - Annual subscription fee based on organization size – no transaction fees

Organization Level	Organization Description – SAMPLE Metrics	2011 Annual Subscription
Entry	Smallest orgs: revenue <\$10M, 1-9 practitioners	\$600
Small	Revenue \$10M - \$100M, 10-50 practitioners, <50 beds	\$6,000
Mid-size	Revenue \$100M - \$500M, 50+ practitioners, 50 – 500 Beds	\$12,000
Large	Revenue \$500M - \$1B, <500K insured lives, 500+ Beds	\$24,000
Leadership	Largest orgs: revenue \$1B+, 500K+ insured lives, 3,000+ FTE	\$48,000

Key Elements – Privacy/Security Model

- Driven by Thin-Layer, OneHealthPort lessons learned
- Built on modular common contractual framework
 - Common agreement between HIE and all trading partners
 - Core elements with optional service components
- Consistent with Washington State and federal law
- **Everyone is responsible within their own perimeter**
 - B2B model targeted at organizational trading partner
 - Organizations responsible for their individual users
 - Whatever consent is needed is secured by trading partners
 - Authentication/authorization handled by data/application owners

HIE Is Live – Ready For Trading Partners

- First seven transactions mapped:
 - Eligibility and benefits transaction (270/271)
 - ePrescribing (NCPDP Script standard 8.1)
 - Continuity of Care Document (CCD)
 - Lab results transaction (HL7)
 - Admission, Discharge, Transfer (ADT in HL7 format)
 - Radiology results reporting (HL7 format)
 - Immunization reporting and query (HL7 format)
- Recruiting Early Adopters
 - In contract discussions with a number of public and private organizations
- Provider Directory open to all
 - Whether or not you contract with the HIE
 - Contact, transactional info
- Next web cast for technical teams and vendors
 - July 12, 2011 from 10-11:30 AM (PDT)
